President of the Conference

Speaking on behalf of Egyptian neurosurgeons, it gives me great pleasure to honorably welcome you to the combined annual neurosurgery conference for Military forces, Ain Shams university, Al-Azhar university and Ministry of Health. We share trainees and academic activities and collaborate at different national levels.

Through the combined efforts, we will be hosting a selected group of international experts to participate and share their input of experiences and technical advancement in neurosurgery.

Experts pediatric neurosurgeons of the European Society of pediatric neurosurgery are invited and will present the 4th cycle of their valuable ESPN pediatric neurosurgery course.

This along with national experts in areas of growing subspecialization in Egypt (endovascular neurosurgery, movement disorders and functional neurosurgery) will ensure a valuable time spent and informative discussions.

Looking forward to see you here. Your participation will make this meeting successful.
