The image is a vertical composition with a textured, brownish-gold background. At the top, there is a network of glowing, translucent blue and green lines representing neural fibers. In the center, a white outline of a domed building with a crescent moon on top is superimposed over a faint, larger-scale version of the neural fiber network. Below the building, a realistic, grayscale image of a human hand holding a human brain is shown, also with a white outline. The text 'Department of Neurology, Cairo University; History' is written in a bold, brown font with a white drop shadow across the middle of the image.

Department of Neurology, Cairo University, History :

(The Father Department of the Mother University)

The modern history of the medicine in Egypt starts on the 11th of March 1827 when the school of Medicine was opened in Abou Zaabal. It was then transferred to Kasr Al-Aini; a palace that dates back to 1466. In 1925 it joined the Egyptian University (established 1908). The foundations of the new faculty and hospital were set on the 16th of December 1928 by King Fouad.

The department was founded in 1932 by the late professor Youssef Barrada, making it the first Neurology Department in the Middle East and Africa. The first diploma in neurology was granted 1942.

The department members became the founders of other neurology departments in Egypt such as in Ain-Shams; Al- Azhar; Assiut; Mansoura; Suez Canal; Minoufiya; Fayoum; and Beni Suef Universities.
