Welcome Message

It is our great pleasure to invite you to the 6th International conference of the Neuropsychiatry Department, Ain Shams University. We are honored to welcome our national and international experts to our annual neurology conference

The main theme of this year is precision medicine In neurology. The era of precision medicine has arrived and conveys tremendous potential, particularly for neurology. The genetic complexity, clinical variability, and inaccessibility of affected tissue in neurodegenerative and neuropsychiatric disorders have largely prevented the development of effective disease-modifying therapeutics. A precision medicine approach that integrates genomics, and deep clinical phenotyping, may facilitate identification of underlying biological drivers and targeted drugs. We look forward to welcoming you in this meeting wishing you a very fruitful conference
